

GREAT COFFEE MOMENTS.
POWERED BY THE FUSION OF QUALITY AND SPEED.

WMF 1500 F

JUST SEVEN SECONDS AWAY FROM FRESHLY BREWED COFFEE QUALITY. WITH WMF 1500 F.

The new WMF 1500 F stands for great coffee moments in next to no time. As bean-to-cup machine, it ensures consistently high quality wherever you need to prepare filtered coffee quickly, with reliable processes and in large quantities.

UNBEATABLE SPEED

- **Fast dispensing when demand is high:** 7 seconds per cup when the storage urn is full.
- **Always stores exactly the right quantity:** the storage urn fills automatically to the desired level and maintains this level.
- **Large storage urn:** with a capacity of up to 4 litres and controlled rebrewing via the pre-selection levels.
- **High-performance brewer:** large volume allows brewing batches from 0.5 to 1 litre in premium quality.
- **Hot water dispensing:** a separate spout ensures high efficiency and user-friendliness. Hot water dispensing can also be carried out parallel to coffee dispensing.

HIGH QUALITY

- **Bean-to-cup coffee machine:** it is filled with whole beans which are freshly ground to guarantee high-quality filtered coffee.
- **Pressure-brew technology:** the freshly ground coffee is brewed uniformly in the brewing chamber with water at the perfect temperature. The coffee is then kept in the storage urn or can be dispensed directly into the cup.
- **Optional provision of two types of bean:** the second bean hopper can be used to store a different type of bean and prepare, for example, decaffeinated coffee.
- **High-performance grinders:** robust, fast and quiet running, electronically controlled and finely adjusted.

PROCESS RELIABILITY AND EASY HANDLING

- **Automatic cleaning:** the WMF 1500 F ensures reliable and hygienic cleaning thanks to the integrated granulate dispenser and the timer function.
- **Easy grounds emptying:** convenient dry grounds disposal in the internal grounds box or via "Grounds disposal through counter".
- **Intuitive touch display:** the interactive 10" colour touch display allows convenient navigation through the menu.

Further information and downloads

ONE MACHINE, A WIDE RANGE OF APPLICATIONS.

Whether it's in a bakery or at a conference – sometimes things need to be done quickly. Especially if you need to have a specific quantity of coffee ready at a specific time and without any compromises when it comes to coffee quality and easy handling. The WMF 1500 F fulfils all these criteria – no matter where it stands.

BAKERIES

Perfect coffee prepared from freshly ground beans: within seconds, pressure-brew technology transforms the coffee beans into full-flavoured, filtered coffee. This makes the WMF 1500 F the perfect supplement to a fully automatic coffee machine. For maximum customer satisfaction in record time.

SEMINARS AND CONFERENCES

With a capacity of four litres and a dispensing speed of seven seconds per cup, the WMF 1500 F can serve large numbers of people attending conferences with fresh filtered coffee even during short breaks. And thanks to the timer function, it can be set to have the coffee ready right on time.

OFFICES

When people need a cup of fresh, aromatic coffee after starting work in the morning or between two meetings, they don't want to have to wait for it. With two bean hoppers and separate hot water dispensing, the WMF 1500 F supplies your workforce with filtered coffee and hot water for a wide variety of teas in premium quality. And you can programme the buttons to dispense the quantity of your choice, allowing your employees to choose between cup and pot. The automatic cleaning function ensures minimal effort to keep the coffee machine clean.

CATERING IN CLINICS AND HOSPITALS

Health care professionals have enough on their hands without having to perform unnecessary tasks. And particularly when you need to have large quantities of coffee available for a large number of persons around the clock, the WMF 1500 F is the perfect partner. An automatic cleaning system and automatic refilling of the storage urn also help to minimise effort.

IT'S POSSIBLE TO HAVE QUALITY AND SPEED AT THE SAME TIME.
THE MANY FEATURES OF THE WMF 1500 F ARE PROOF OF THIS.

PREMIUM QUALITY – WHENEVER YOU WANT IT.

The new WMF 1500 F is the perfect solution if you want great coffee in next to no time. Whether you want to offer coffee prepared in advance or dispense it straight into the cup: in just a few seconds, it serves your guests freshly filtered coffee. And if you prefer a different hot beverage, the separate hot water spout offers you further options.

HIGH-PERFORMANCE GRINDERS FOR FRESHNESS FROM THE START.

Because we know freshness is important right from the start, the machine grinds whole coffee beans. And the option of using up to two coffee grinders gives you flexibility, allowing you to offer beans of different types – beans with different aromas or decaffeinated coffee.

PRESSURE-BREW TECHNOLOGY FOR DELICIOUS COFFEE IN RECORD TIME.

Once the coffee grinder has finished grinding the beans, the precisely portioned ground coffee enters the brewing chamber. During the brewing processes, water at a precisely controlled temperature flows onto the ground coffee via a distributor sieve, ensuring uniform extraction.

FLEXIBLE BREWING QUANTITIES, AUTOMATIC TOPPING-UP.

An integrated storage urn with a capacity of four litres allows even faster dispensing. A user-friendly timer function allows you to adjust the automatic filling level of the urn to suit your individual needs. With a high-performance brewer, it is possible to prepare 0.5 to 1 litre of filtered coffee in premium quality in record time.

MAXIMUM ENJOYMENT WITH MINIMUM EFFORT.

The automatic cleaning system guarantees perfect hygiene and cleanliness without compromises, even during peak periods. An integrated timer can be set individually to control the cleaning of all components which come into contact with the coffee.

EASY DISPOSAL OF DRY GROUNDS.

After a dispensing operation, the WMF 1500 F ejects the dry, used coffee grounds into the grounds container or through an opening in the counter directly into the waste container ("Grounds disposal through counter") – easy and convenient.

We write history – every day. The development of our coffee machines began way back in 1927, the year in which we manufactured the first professional coffee machine "Made in Germany". And ever since, we have been learning continuously, with and from our customers, in order to create the optimum coffee experience for you.

TRADITION

Our long-standing tradition of German engineering and craftsmanship and our love of detail are evident to this day, because we are well-known as the manufacturers of outstanding coffee machines, for our comprehensive service and first-class coffee experience.

WHO

**QUALITY
MADE IN GERMANY**

Our high quality standards are evident not only in the design and development of our products, but also at our production site in Geislingen. Only first-class materials and cutting-edge technology are used. In this way, we ensure that every machine offers a long service life and outstanding performance.

INNOVATION

We are continually setting new standards and developing innovative solutions to help you optimise your coffee business.

WE
ARE

SERVICE

Our quality promise does not end when our coffee machines roll off the production line. Highest manufacturing quality and an unparalleled service network guarantee the durability of our machines. Our 320 technicians worldwide ensure that your coffee machine functions reliably and supplies excellent coffee.

WMF CoffeeConnect as standard.

The WMF 1500 F is digitally ready. With our telemetry solution, your machines are connected, you can view machine data and optimise processes. This allows you to improve the customer experience and realise completely new business models.

OVERVIEW OF TECHNICAL DATA

325 mm

881 mm

590 mm

WMF 1500 F

Power connection – coffee and hot water output	5,7 – 6,75 kW / 380 – 415 V – 220 cups
Recommended daily output / max. output per hour*	220 cups
External dimensions (width / height / depth)	325 / 881 / 590 mm
Water supply	Fixed water supply
Empty weight	Approx. 38 kg
Universally lockable product hopper, granulate hopper and storage urn	

* Output is determined using a machine with constant water supply and is dependent on cup size, quality settings, spout, model and nominal power rating. The recommended maximum daily capacity is based on our catalogued service concept. However, these average values serve merely as a guideline. Let our trained WMF team match the ideal coffee machine design to your specific needs.
